

**FIREWISE USA™**

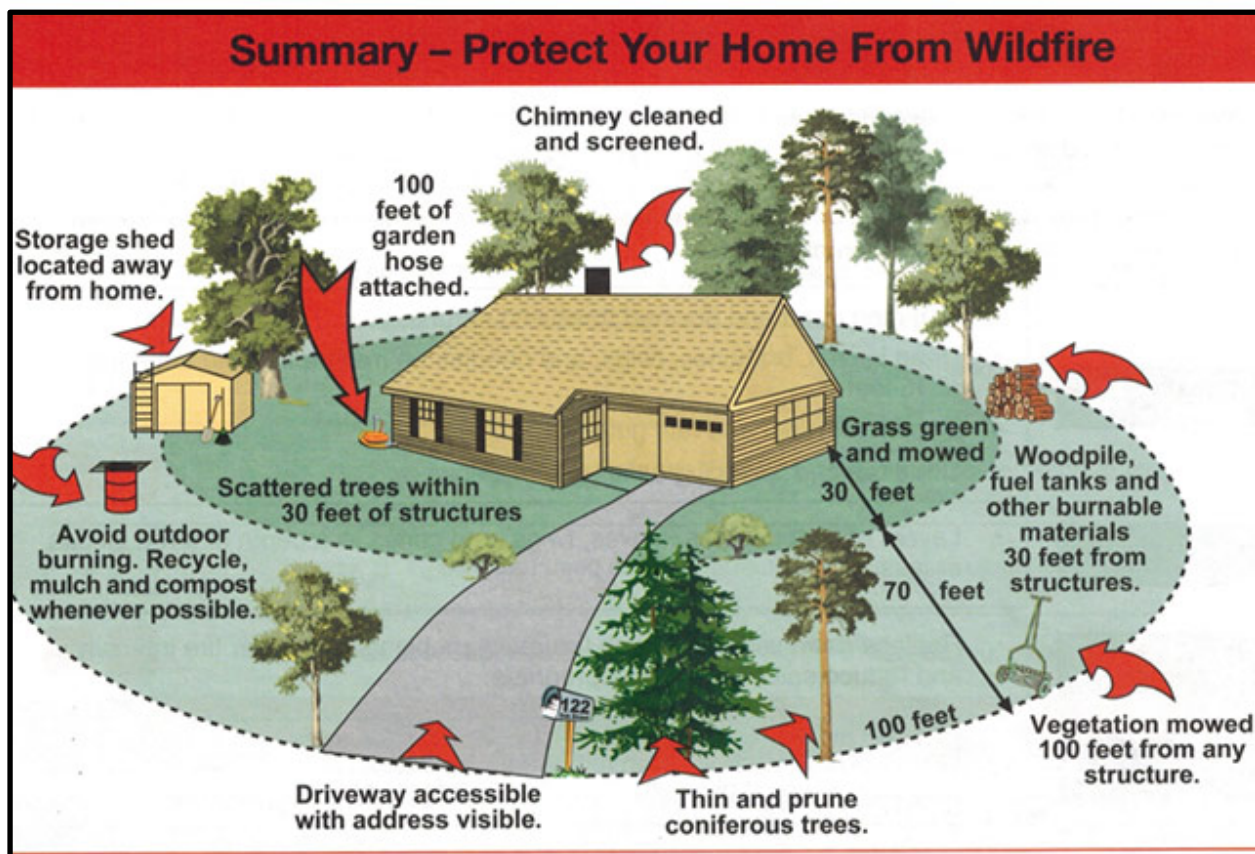

Residents reducing wildfire risks

## Fire Mitigation around the Home

As we enter fire season, we want to make sure you are prepared and equipped with a basic knowledge of fire mitigation techniques that you can practice around your own home.

Remember to:

- Clean your chimney and attach a spark arrestor to the top, if you don't already have one
- Place woodpiles at least 30 feet away from any structure
- Thin and prune dead limbs from trees six feet off the ground
- Remove dead weeds and brush from your property

The Town of Crestone also provides **free brush removal** for all town residents. Just gather your brush and tree limbs at the edge of your property and contact Town Hall at (719) 256-4313 to request a pickup.
