---

### What is e-waste:

Electronic waste is anything with a plug or a circuit board (excluding major appliances and A/C units). The most commonly recycled items are computers, monitors, printers, TV's, and small appliances.

### Why is e-waste a problem?

- E-Waste is toxic and hazardous, containing lead, cadmium, beryllium, mercury, and arsenic.
- CRTs contain 4 - 12 lbs of lead and account for 40% of all lead in landfills
- E-Waste accounts for 70% of heavy metals in landfills with potential contamination for soil and groundwater
- Incinerating computer plastics with brominated flame retardants generates toxic emissions

### Reasons to recycle with us

- ⇒ Keep jobs in the valley- Create jobs & save taxpayer dollars
- ⇒ Support job program for adults with developmental disabilities
  - ⇒ Convenient drop off location in Alamosa
  - ⇒ Pickup services available
  - ⇒ Keep electronic waste out of landfill
  - ⇒ Secure destruction of your personal data
